Winkhaus Safety and Security Catch Restrictors for Window Safety and Security

OBV Safety Catch and OBSL Centurion Restrictor

The Winkhaus OBV Safety Catch and Centurion Security OBSL are a family of window restrictors, which are designed to help prevent small children opening windows fully and falling out.

The larger Centurion model has a fully functioning key deadlocking facility, which makes it an ideal product for upgrading the security of existing PVCu and timber windows. An extensive range of angle packers is available to allow both the OBV Safety Catch Restrictor and the Centurion Security Restrictor to be fitted to PVCu windows.

Key features:

The robust design incorporates the following features:

- The Centurion and OBV automatically prevents the opening of a window greater than 50mm - 100mm (depending on the positioning on the window).
- The Centurion and OBV locking bar can be released for full opening of the sash by keeping the push button depressed.

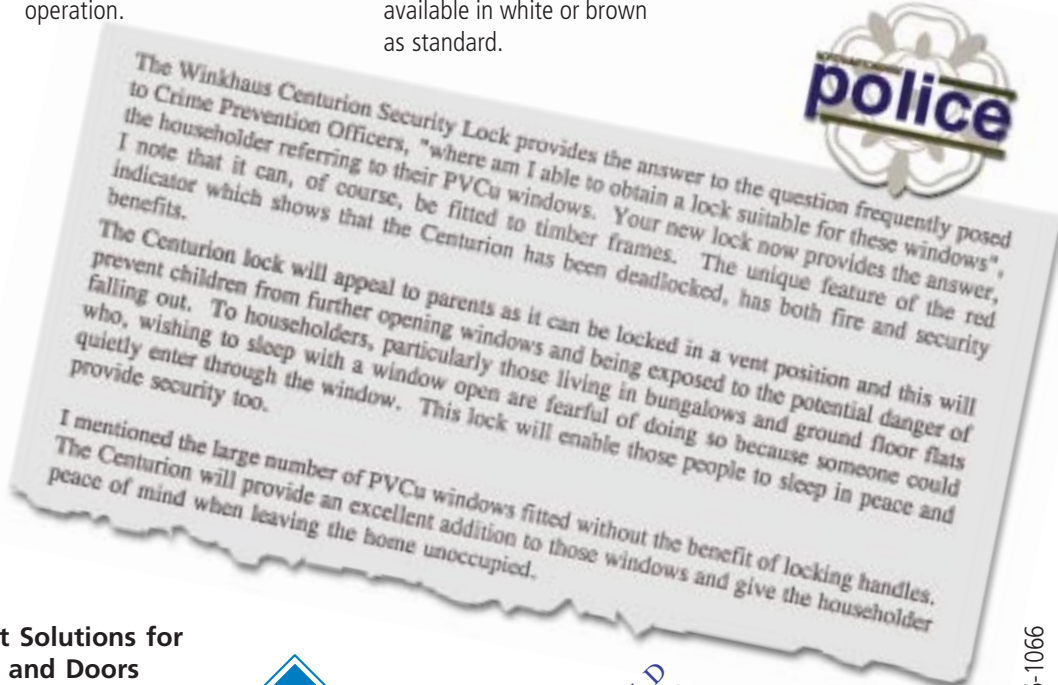

- The Centurion and OBV will automatically re-engage when the window is closed.
- The Centurion can be deadlocked by key in both the closed position AND the open position.
- For both security and fire safety reasons a red indicator shows that the Centurion has been deadlocked.
- Surface mounted vertically or horizontally on both outward opening and inward opening windows, either as a prime locking system, or retrofitted to existing windows as an additional security and safety device.
- 3mm adjustment of steel hook possible for correct operation.
- Easily fitted using 5 screws. The steel hook is fixed with three screws (for PVCu windows fixing into reinforcement is recommended). Drill jigs available for both site fixing or factory fixing.
- An extensive range of packers and mounting blocks available
- 1mm shims available for optimum positioning of steel hook.
- Purpose designed to provide high levels of child safety and increased security for both new and existing windows, together with a lockable 50mm vent position.
- The Centurion and OBV is available in white or brown as standard.
